SUMMARY

Full-Stack Software Engineer with 5+ years of experience building scalable, AI-powered, and data-driven web applications. Skilled in front-end and back-end development, API design, and AWS cloud infrastructure, with a proven record of delivering high-performance search systems, automated data pipelines, and LLM-integrated features that power secure, reliable, and user-focused products.

WORK EXPERIENCE

Full Stack Engineer

Apr 2024 - Present

Avalon AI

- Collaborated with stakeholders to translate complex requirements into technical specs for a HIPAA-compliant platform.
- Architected, implemented, and delivered a multi-tenant healthcare platform using Next.js, AWS Amplify, API Gateway, Lambda, Cognito, DynamoDB, and OpenSearch with a microservices-based architecture to enable independent scaling of core services.
- Engineered an event-driven data ingestion pipeline (S3 → Step Functions/Lambda → OpenSearch) with zero-downtime rollovers.
- Built CI/CD pipelines with automated test gates and linting, cutting release cycle by 25% and raising reliability to 99.9%.
- Participated in daily Scrum meetings, mentored teammates across the stack, driving code reviews and UX improvements.

Application AI Engineer

Dec 2020 - Nov 2023

Amplify AI

- Delivered and maintained 100+ AI chatbot instances across Facebook, Twitter, and Twilio SMS for enterprise clients.
- Created front-end applications (React/Svelte), improving bundle size, load times through component libraries, and SSR/ISR.
- Developed a client-tailoring toolkit that cut customization cycles from days to hours, reducing onboarding time by 50%.
- Strengthened platform security with MFA, key rotation, and session validation, cutting auth-related incidents.

Web Developer

Sep 2019 - Dec 2020

Freelance

- Designed and launched modern, responsive landing pages and animated portfolios for professionals and content creators.
- Achieved 90–100 Lighthouse scores using performance optimization, lazy loading, code-splitting, and CDN caching.
- Integrated SEO, analytics, and CMS platforms (Sanity, Contentful) with automated deployments on Vercel/Netlify.

EDUCATION

Postgraduate in Full Stack Web Development

2021 - 2022

California Institute of Technology

- **Capstone:** Full-stack bank portal web app with CI/CD pipeline (Angular, Java, Spring Boot, MySQL, AWS)

Bachelor of Science in Software Engineering

2018 - 2020

University of California, Irvine

- **Capstone:** Admin portal & visualizer for EVSE mobile app (MERN) | **Honor Society:** NSLS (ΣΑΠ) | **GPA:** 3.5
- **Publications:** Mapping and Taking Stock of the Personal Informatics Literature, ACM Journals | Dec 2020

SKILLS

Programming/Scripting: HTML5/CSS3, TypeScript/JavaScript, Java, Python, C++, SQL, Bash | **Frontend/Frameworks:** React.js, Next.js, Svelte.js, Angular, Tailwind, Framer Motion | **Backend/APIs:** Node.js, Express, Flask, FastAPI, Django, Spring Boot, REST, GraphQL, AWS (API Gateway, Lambda) | **Database/ETL/Search:** MongoDB, MySQL, PostgreSQL, Redis, AWS (Glue, OpenSearch, DynamoDB) | **Auth/Security:** AWS (IAM, Cognito, WAF), OAuth, JWT, MFA | **Testing/QA/Monitoring:** Jest, Nose, Pytest, Playwright, Postman | **Cloud/DevOps:** AWS (Amplify, CloudFormation, CDK, CloudWatch, Step Functions, SQS, EC2), Git, GitHub Actions, Jira, Jenkins, Terraform, Vercel, Docker, Kubernetes | **AI/LLMs:** OpenAI GPT-3/GPT-4, Copilot, Claude Code
